Lick 2: Moving With the Chords

This lick is really cool and uses the whacky idea of creating more tension by taking a repeated lick up a semitone, before resolving the Eb minor shape 1 again. The repeated lick starts in the Eb minor shape 5, before stepping up a semitone. The semitone step-up plays the part of the tension, as it sounds almost like a key change, which the pentatonic shape 1 in Eb minor resolves. The shapes can be found in the fretboard diagrams.
