## Ear training...

This process is all part of your ear training, and absolutely needs to be done! If you rush into learning a tune without knowing what it really sounds like you're already set up to fail. Being able to hum the track, know the rhythm and even be able to discover the structure of the track is huge! So, don't just say "yeah I'm moving onto the next one...", actually take the time over the next day or two to put this track on your headphones and learn it mentally first! It will actually speed up the overall process for you.
