## The Hardware

UNIT 1 • **LESSON 5** << PREVIOUS NEXT >>

### The Desk

Finally, we need to discuss the overall hardware setup. The goal, as always, is for ease. Once it's all set up it should be quick and easy to get a few guitar parts into the computer. You pick up the guitar, plug-in and fire up your DAW (more on that in Unit 3). So, this is the kind of set-up you might consider:

we're using a digital [Kemper](#) amp connected to the interface, making for quick and easy recording.

We have a nice big monitor on the desk to get the most out of our DAW. We then can plug in the laptop via USB-C.

The audio interface is set up and ready to receive the guitar!
