Barre Chords

A barre chord is a chord where you play multiple notes using just one finger. This can range from two notes all the way up to six notes at a time with the same finger. This means for us as guitar players, that we don't need to rely on open strings and open string chord shapes. This opens up a new world of chord possibilities that were unavailable before. An intermediate player should be familiar with four main barre chord shapes! The four shapes you need can be found in the fretboard diagrams.
