Essential Theory Part 2

UNIT 2 • **LESSON 6** << PREVIOUS NEXT >>

What Is Chord Construction?

Chord construction is the theory behind all the chord shapes we play on the guitar. Have you ever wondered why this chord is a 'G' or that chord is an 'A minor'? Well, now that we know how to construct a major scale, we can begin to understand and answer these questions! To put it simply, there is a formula that allows us to construct pretty much any chord, so all you need to know is the formula for a particular chord. We will be looking at the formulas for major, minor and diminished chords over the next 4 lessons.
