The Chorus

Let's now dive into the chorus! The first step is to learn the chord chart for this section, which is shown below.

| A C | D | A C | D | (x2)

An important part of this progression is the speed at which you need to make the change from A to G. It is half a bar each, which means you can **count "1 and 2 and" on the A, followed by "3 and 4 and" on the G**. It also requires a slightly different strumming pattern, which looks like this:

UNIT 5

Second Song 0% ^

In this unit we will be using everything we have learnt so far to put together our next song, from scratch, and learn it just like a pro guitarist would. That means we'll be tackling the chords, rhythm and even your first ever guitar solo!

UNIT 6

Getting Ready 0% ✓

You use the above strumming pattern for the first bar, then move into your universal strumming pattern over the D. **You then repeat this 4 times to make the whole chorus.** Take your time with that change from A major to G major, as it's tough to get it that quick. Once again, we will be working with this song all the way through the course and beyond, so enjoy the ride!

“

As the G major chord is still new, that change from A to G may keep you very busy for a while! It may be wise to separate that from the track and just practice it separately as well, in your guitar gym sections!
