## Dance of The Sugarplum Fairy Metal Style

UNIT 8 • LESSON 1 [« PREVIOUS](#) [NEXT »](#)

[Lesson notes](#) [Interactive tab](#)

### Intro & Tone

This track beautifully lends itself to a metal style as it's already pretty dark sounding, even when you take away the epic levels of gain! We have two parts for you to learn in this track, the rather impressive chord selection (which is still part of the lead really) and the lead part using pinched harmonics, dive bombs and more high gain fun! Let's kick off as always with the tone and how we achieved it.

The base of our rhythm tone is using a Bogner 412 style preset in TONEX by IK Multimedia. However, for the lead tone, we are using a Soldano style amp plus the super cool T-Rex Mudhoney pedal.

**PARKER FLY**

We used the most metal guitar we have in the office, the jet-black Parker Fly! Generally, we were using the Bridge humbucker to get that full tone that also had enough clarity to play pretty tight chords (notes with intervals not far apart).
